
Overview

This standard is for archaeologists whose role includes supporting communities and community groups to engage with the historic environment, identifying how they would like to engage and what support they need to do so. In doing so, it is about identifying new audiences as well as providing support for individuals and groups already engaged in historic environment activity.

CCSAPAG6

Support community engagement with the historic environment

Performance criteria

You must be able to:

Identify potential local user groups.

- P1 develop an understanding of your organisation's existing links with the community/communities
- P2 identify other existing local groups or other potential audiences
- P3 identify where potential exists for new groups to be formed
- P4 identify potential barriers that may inhibit community engagement and how these may be overcome

You must be able to:

Evaluate the needs and wishes of groups

- P5 discuss and clarify aspirations with communities/groups
- P6 work with communities/groups to identify new engagement activities relevant to local needs
- P7 challenge community aspirations where they may conflict with the legitimate aspirations of others

You must be able to:

Develop activities to support the engagement of groups with the historic environment

- P8 research previous engagement activities by your own organisation and by local groups and individuals
- P9 identify the appropriate level of support required for different groups
- P10 experiment with different approaches to professional practice and community engagement
- P11 develop appropriate tools and material to support the engagement of groups with the historic environment
- P12 promote and apply appropriate professional standards

You must be able to:

Evaluate the effectiveness and impact of work with groups

- P13 use self evaluation as a way of learning together and improving practice
- P14 develop ongoing networks and sharing of practice for community engagement
- P15 evaluate the success of your work with communities/groups against your aims and objectives
- P16 invite community responses to the work you have done with them

You must be able to:

Integrate work with groups into other work programmes where appropriate

- P17 promote and publicise the work of communities/groups you have supported
- P18 consider, and where appropriate implement opportunities for community participation in other work programmes
- P19 develop mechanisms for a two-way flow of information between your organisation and communities/groups.

CCSAPAG6

Support community engagement with the historic environment

You must be able to:

Adopt an ethical approach to community engagement

P20 apply relevant technical and ethical standards of work

P21 be sensitive to any continuing relationship between the historic environment and living, successor or descendant groups
