

LANAnC25

Dry a dog's coat ready for styling and finishing

Overview

This standard covers the processes of drying a dog's coat and skin ready for styling and finishing using the appropriate equipment and products.

It includes appropriate and safe handling techniques, identification of coat types and recognising signs of abnormalities.

It is your responsibility to monitor and maintain the health and safety of yourself, the dog and others in the area.

You will need to be aware of your own limitations and ensure that you meet the legal responsibilities for the duty of care under animal health and welfare legislation.

This standard is for anyone who carries out the drying of dogs' coats ready for styling and finishing.

Performance criteria

You must be able to:

- P1 maintain your own professional conduct and ethics and work within the limits of your own authority, expertise, training, competence and experience
- P2 carry out all work in accordance with instructions, records and workplace procedures
- P3 comply with relevant animal health and welfare and other animal-related legislation and associated codes of practice at all times
- P4 carry out all work in accordance with relevant environmental and health and safety legislation, risk assessment requirements, codes of practice and company policies
- P5 maintain appropriate levels of hygiene and bio-security
- P6 check that the work area is safe, secure clean and ready for use
- P7 select, prepare, use and maintain equipment in a safe, clean and effective condition throughout
- P8 use the correct **protective equipment and clothing** in accordance with workplace policy and procedures
- P9 observe and recognise the behaviour of the dog and record as appropriate
- P10 communicate effectively with others and seek professional advice when necessary
- P11 transfer dog to drying area and secure in an appropriate manner that promotes confidence and co-operation and maintains the health and safety of all throughout
- P12 dry dog's coat using drying equipment and hand tools that are suitable for the dog, its **coat type** and condition and the style that is to be achieved
- P13 establish the correct drying temperature and velocity and monitor the condition of the dog's coat and skin during the drying process to ensure it does not overheat
- P14 closely monitor the dog during drying in order to recognise when the temperature, velocity or drying technique appears to be causing distress to the dog and take the appropriate action
- P15 brush the coat during drying to achieve the correct finish appropriate to the **style** that is to be achieved
- P16 check the coat to confirm that it is completely dry and free from tangles and knots
- P17 recognise when **observation of the dog** reveals a possible infestation or abnormal condition and report to the appropriate person
- P18 clean/sterilise and store equipment used in accordance with workplace procedures and report any faults to the appropriate person

- 20 anal glands

Glossary

Veterinary Surgeons Act (1966):

It is illegal under the Veterinary Surgeons Act (1966) for non-veterinary surgeons to practise veterinary surgery.

The Act defines Veterinary Surgery as:

- the diagnosis of diseases in, and injuries to, animals including tests performed on animals for diagnostic purposes;
- the giving of advice based upon such diagnosis;
- the medical or surgical treatment of animals; and
- the performance of surgical operations on animals.

Current animal welfare legislation:

England and Wales, Animal Welfare Act 2006

Scotland, Animal Health and Welfare Act 2006

Northern Ireland, Welfare of Animals Act (Northern Ireland) 2011

Protective equipment and clothing could include:

- gloves
- apron
