

LANFe17

Control the deployment of materials and components

Overview

This standard describes how to control the deployment of materials and components.

This standard is designed for lead installers. It can be applied to support any fence installation operation.

This standard covers:

- Identifying material and component requirements
- Ensuring requests are accurate
- Controlling storage
- Dealing with surplus.

Performance criteria

You must be able to:

- P1 ensure that health and safety policies and risk assessment requirements are put into practice in the deployment of materials and components
- P2 identify material and component requirements including quality, quantity and specifications to meet operational/customer requirements
- P3 ensure requests for materials and components are accurate, complete and conform with the programme requirements
- P4 maintain records of material and components and evidence of deliveries
- P5 control storage of materials and components ensuring that surplus materials or components are dealt with according to organisational requirements
- P6 maintain the efficient deployment of materials and components

Knowledge and understanding

You need to know and understand:

- K1 the health and safety and risk assessment requirements associated with the deployment of materials and components
- K2 how to communicate health and safety policies and risk assessment requirements to relevant personnel ensuring they understand their responsibilities
- K3 sources of information relating to material and component requirements
- K4 how to interpret the specifications for material and component requirements
- K5 why deliveries should match programme requirements
- K6 procedures for requesting/calling-off materials and components
- K7 the means used to record stock deliveries and usage
- K8 discrepancies likely to occur with material and component deliveries
- K9 how to deal with factors which disrupt the deployment of materials and components
- K10 the requirements for storage of different materials and components
- K11 organisational procedures for dealing with surplus materials and components
