

LANTw18

Carry out emergency treework operations

Overview

This standard is about undertaking emergency treework operations. The standard includes the undertaking of emergency/urgent tree works typically as a result of tree failure, vehicular accident or weather-related emergency

The use of equipment and all operations must meet the guidance issued by the responsible officer, e.g. fire brigade representative or client officer, the requirements of the law, current codes of practice and industry guides

It is important to be aware how the complexity of the emergency situation can affect the treework operations to be undertaken

As a minimum an emergency treework operations team must all be well equipped and have the appropriate qualifications and experience

This standard is for those involved in undertaking emergency treework operations when requested to do so
