## Construct a green wood product to client specification

---

### Overview

This standard is about constructing a green wood or coppice product working from a specification to meet client requirements

This standard includes:

- following specifications for complex products
- planning and meeting work schedules
- selecting, assembling and maintaining tools, equipment and materials
- bringing materials into working condition for complex products
- making, treating and finishing complex products
- recording information for costing and stock control

This standard is for highly skilled crafts people in the green wood trades who can make complex products
