Additional Information

Scope/range related to performance criteria

The details in this field are explanatory statements of scope and/or examples of possible contexts in which the NOS may apply; they are not to be regarded as range statements required for achievement of the NOS.

Note: Where a child or young person finds it difficult or impossible to express their own preferences and make decisions about their life, achievement of this standard may require the involvement of advocates to represent the views and best interests of the child or young person.

Where there are language differences within the work setting, achievement of this standard may require the involvement of interpreters or translation services.

Barriers to participation are anything that prevents the child participating fully in activities and experiences offered by the setting or service

Children with whom you are working, except where otherwise stated

Others are your colleagues and other professionals whose work contributes to the child or young person's well-being and who enable you to carry out your role

Scope/range relating to knowledge and understanding

The details in this field are explanatory statements of scope and/or examples of possible contexts in which the NOS may apply; they are not to be regarded as range statements required for achievement of the NOS.

All knowledge statements must be applied in the context of this standard.

Additional support needs are physical or mental impairments which have a substantial and long-term adverse effect on the child's ability to carry out normal day-to-day activities. They includes special educational needs (SEN) which can mean that children with special educational needs learn differently from most children of the same age. These children may need extra or different help from that given to other children

Assistive technology is technology that supports a child's ability to participate in the setting. It is a broad term that includes items ranging from e.g. a simple foam wedge for positioning to sophisticated power mobility devices

Augmentative and Alternative Communication (AAC) refers to any device, system or special method of communication that helps individuals with communication difficulties to communicate more easily and effectively: e.g. symbols, communication boards, voice output communication aids, sign language or facial expressions and gestures

Factors that may affect the health, wellbeing and development may include adverse circumstances or trauma before or during birth; autistic spectrum conditions; discrimination; domestic violence; family circumstances; foetal alcohol syndrome; harm or abuse; injury; learning disability; medical conditions (chronic or acute); mental health; physical disability; physical ill health; poverty; profound or complex needs; sensory needs; social deprivation; substance misuse

Integration is inclusion of children with disabilities or special educational needs in mainstream settings

Transitions may include starting nursery for the first time, moving from nursery to school, moving home, the birth of a sibling, other changes affecting the child or young person
