

SFHCHS115

Apply topical medications to treat dermatological conditions

Overview

This standard is about the application of safe and effective topical medications for dermatological conditions. It may be undertaken in a wide range of healthcare settings for both adults and children. This standard will be relevant to the application of topical medications for individuals, both adults and children who may be in-patients, in out-patients, in ambulatory settings and in general practice.

Users of this standard will need to ensure that practice reflects up to date information and policies.

Apply topical medications to treat dermatological conditions

Performance criteria

You must be able to:

- P1 apply standard precautions for infection control and other health and safety measures
- P2 confirm individual identity prior to administration of medication
- P3 obtain, or review all existing information concerning the reason for referral or follow up
- P4 explain the process, procedure, potential side effects and need for adherence to treatment regime to the individual and confirm their knowledge
- P5 respond to the concerns, anxieties and perceptions of individuals and carers regarding the use and application of topical medications
- P6 identify any contra-indications to the application of selected treatment and take action to avoid potential risks to the individual's health
- P7 apply topical medications:
 - P7.1 in accordance with product protocol
 - P7.2 in such a way as to minimise pain, itching or unnecessary discomfort
- P8 assess the long-term effects of application and manage or refer any adverse reactions that may put the individual at risk
- P9 maintain complete, accurate records of treatment, including any assumptions made and make these available for future reference in line with organisational practice
- P10 initiate action for referral or further appointments to meet the needs of the individual and provide the best possible outcome for the individual
- P11 ensure that the individual has a follow up appointment scheduled
