

## SFHCHS13

### Undertake wound drainage care

---

#### Overview

This standard covers undertaking wound drainage care. This involves monitoring wound drainage and changing wound drainage attachments as and when directed. These activities must be undertaken using an aseptic technique and following local guidelines and procedures. The standard is applicable in a variety of care settings including hospitals, care homes, the individuals own home or other community settings such as GP surgeries.

Users of this standard will need to ensure that practice reflects up to date information and policies.

### Performance criteria

*You must be able to:*

- P1 apply standard precautions for infection prevention and control and take other appropriate health and safety measures
- P2 check the individual's identity and confirm the planned activity
- P3 give the individual relevant information, support and reassurance in a manner which is sensitive to their needs and concerns and gain valid consent to carry out planned activities related to the care of wound drainage
- P4 observe and measure the individual's wound drainage accurately using the correct technique and equipment at specified time(s) according to the plan of care, or as directed by the registered practitioner
- P5 record measurements correctly in the required format, and report them accurately to the appropriate member of the care team
- P6 report any problems in measuring or recording wound drainage promptly to the appropriate member of the care team
- P7 confirm all necessary equipment and materials for changing drainage collection systems are:
  - P7.1 appropriate for the activity
  - P7.2 fit for purpose
  - P7.3 attach replacement drainage collection systems:
  - P7.4 using appropriate techniques
  - P7.5 in line with manufacturer's instructions
  - P7.6 in a manner which optimises the patient's comfort and dignity and minimises pain and trauma
  - P7.7 maintain the sterility of the drainage system prior to and during attachment
- P8 ensure that:
  - P8.1 drains are secured effectively and appropriately
  - P8.2 vacuum seals on drains are intact
  - P8.3 drains are positioned to prevent inappropriate backflow and/or patient harm
- P9 recognise and report any condition or behaviour which may signify adverse reactions to the activity and take the appropriate action
- P10 where appropriate, record the outcomes of the activity correctly using the method agreed in your care setting
- P11 report your findings and/or activity to the appropriate member of the care team

### Knowledge and understanding

*You need to know and understand:*

- K1 the current European and National legislation, national guidelines, organisational policies and protocols in accordance with Clinical/Corporate Governance which affect your work practice in relation to undertaking wound drainage care
- K2 your responsibilities and accountability in relation to the current European and National legislation, national guidelines and local policies and protocols and Clinical/Corporate Governance
- K3 the duty to report any acts or omissions in care that could be detrimental to yourself, other individuals or your employer
- K4 the importance of working within your own sphere of competence and seeking advice when faced with situations outside your sphere of competence
- K5 what valid consent means and why it must be obtained and confirmed prior to actions being taken
- K6 the importance of applying standard precautions to undertaking wound drainage care and the potential consequences of poor practice
- K7 why individuals should be supported and told about the nature of wound drainage
- K8 the concerns and worries which individuals or client groups may have in relation to some clinical procedures
- K9 the adverse reactions which may occur and how to identify and deal with these
- K10 the anatomy and physiology of the skin and underlying structures in relation to:
  - K10.1 the positioning of wound drains
  - K10.2 undertaking safe and effective wound care
- K11 the potential consequences of contamination of wound drainage systems while undertaking care activities
- K12 the types, purpose and function of materials and equipment needed for measuring wound drainage
- K13 the principles of wound drainage
- K14 methods and techniques for preparing and applying dressings and wound supports related to wound drains
- K15 the purposes of measuring the individual's wound drainage
- K16 the importance of distinguishing between body fluids and those introduced during clinical procedures in order to get accurate fluid loss measurements
- K17 the methods and techniques for measuring wound drainage
- K18 the potential hazards associated with measuring wound drainage, and how they can be avoided or minimised
- K19 the importance of following the procedure exactly as it is specified, and
