
Overview

This standard relates to the implementation an individual's treatment plan. This may be undertaken in a wide variety of settings and healthcare individuals.

Users of this standard will need to ensure that practice reflects up to date information and policies.

SFHCHS225

Implement a treatment plan

Performance criteria

You must be able to:

- P1 work within your level of competence, responsibility and accountability
- P2 check the individual's identity and check valid consent/authorisation to the treatment plan or intervention
- P3 apply appropriate health and safety measures, infection prevention and control and personal protective equipment within your work practice
- P4 review relevant data and information to ensure the appropriateness of the proposed treatment plan or intervention to the individual's current status and likely future needs
- P5 select the appropriate treatment plan in accordance with local protocols, procedures and identify any special requirements to meet the individual's needs
- P6 clearly explain the proposed treatment plan with the individual and /or relevant others
- P7 where appropriate, select suitable equipment, medical device or product and any other requirements for the treatment plan or intervention
- P8 confirm with the individual and/or relevant others their agreement and authorisation for the selected treatment plan or intervention
- P9 provide information for any required skills or activities to enable individuals to follow the treatment plan or recuperate as appropriate in their own environment
- P10 provide other stakeholders, who are to be involved in monitoring the treatment plan with sufficient and timely information in accordance with organisational policy and protocols
- P11 record all findings, discussion and agreements and report accurately, completely and legibly using appropriate documentation processes and in accordance with confidentiality requirements
- P12 issue a report to stakeholders at sufficient level of detail with any recommendations, findings and intended outcomes of the treatment plan
- P13 confirm that individual and relevant others have relevant documentation and understand what further action will be taken
- P14 store and maintain full, accurate and legible records of information collected in line with current legislation, guidelines and local policies and procedures

Knowledge and understanding

You need to know and understand:

- K1 your own level of competence, authority and specialist knowledge base
- K2 the range of stakeholders required in implementation of a treatment plan and their information needs, roles, responsibilities and capabilities
- K3 how to communicate effectively in the appropriate medium to meet any recipients' needs and preferences
- K4 the importance of checking the individual' identity, agreement and valid consent/authorisation for the treatment plan or intervention and how to do so
- K5 the range of health and safety measures, infection prevention and control and the relevant personal protective equipment, their importance and application within your work practice
- K6 the importance of explaining the treatment plan or intervention and as appropriate, the frequency of interventions within a treatment plan, with the individual and/or relevant others
- K7 the importance of ethical issues surrounding the provision of treatment plans and how to implement these
- K8 the range of relevant protocols and procedures and their interpretation for any required treatment interventions within the treatment plan
- K9 the relevant underpinning principles, purpose and application of the relevant science, technology or engineering within your scope of practice applicable to the treatment plan or intervention
- K10 the range of issues and contra-indications that required consideration for the appropriate treatment plan or intervention for individuals and their relevant others
- K11 the range and types of support needed by individuals and how to identify them
- K12 the factors affecting the suitability and effectiveness of appropriate treatment plans or interventions for the individual's condition
- K13 the range and types of problems which may occur with treatment plans and how to prevent these
- K14 the importance of working collaboratively with multi-disciplinary teams and how to seek advice and support from other colleagues
- K15 the range and types of equipment, medical devices and products relevant to the treatment plan within your speciality and relevant to the individual's needs
- K16 the measurement parameters required for interventions involved in the treatment plan
- K17 the sources of reliable information and their importance for the individual or relevant others regarding their treatment plan or intervention and how to access them
- K18 the importance of recording procedures and documentation relating to
