

SFHCHS59

Respond to referrals of individuals with health conditions

Overview

This standard covers the process of receiving and responding to referrals of individuals who have health conditions. The referral may be medical, social or environmental and may require further referral following assessment. The practitioner will need to review the referral information and determine its priority. The individual should be assisted throughout the process, and provided with information on what is happening.

Users of this standard will need to ensure that practice reflects up to date information and policies.

SFHCHS59

Respond to referrals of individuals with health conditions

Performance criteria

You must be able to:

- P1 respect the individual's rights and wishes relating to their privacy, beliefs and dignity, and obtain informed consent whenever appropriate
- P2 respond to referral enquiries by providing relevant information
- P3 process the referral effectively
- P4 review referral information to confirm the need for an assessment
- P5 determine the priority of the individual's needs from the referral information provided by the referrer and your confirmation of the need for assessment
- P6 specify what type of referral action should be taken
- P7 ensure that the individual and their carer is provided with information and appropriate assistance to progress with the referral process
- P8 provide information to other practitioners on the important referral information that is required from them
- P9 keep accurate, legible and complete records, and comply with all the relevant legal, professional, and organisational requirements and guidelines
