## Use multi-generational family history information to draw a pedigree

**Overview** 

This standard is about using the multi-generational family history gathered from an individual and their family members to draw up a pedigree using internationally recognised symbols and nomenclature. Users of this standard will need to ensure that practice reflects up to date information and policies.

## Use multi-generational family history information to draw a pedigree

### Performance criteria

# You must be able to: P1 ensure sufficient and appropriate multi-generational family history is available so that you can draw the pedigree in as much detail as required

- P2 clarify family history details, if the need arises, with the individual who gave the information or from others, ensuring that appropriate consent has been obtained
- P3 use the standard convention for laying out a pedigree
- P4 use appropriate internationally recognised symbols and notations for drawing:
  - P4.1 the relationship of individuals to the person seeking information
  - P4.2 gender
  - P4.3 alive or deceased
  - P4.4 their disease status
  - P4.5 on-going and unsuccessful pregnancies
- P5 provide a key for each of the different symbols
- P6 add personal information as appropriate and ensure the drawing is legible
- P7 write your name legibly, sign and date the pedigree
- P8 maintain the chain of confidentiality of records when using or passing on the pedigree

## Use multi-generational family history information to draw a pedigree

### Knowledge and understanding

### You need to know and understand:

- K1 how to translate family history information into a pedigree
- K2 internationally recognised pedigree symbols and their relationship to each other
- K3 the standard convention of laying out a pedigree
- K4 the role of the pedigree as a means of representing multi-generational family history information
- K5 best practice guidelines relevant to pedigrees
- K6 record keeping practices and procedures in relation to drawing a pedigree
- K7 consent and confidentiality guidelines in relation to an individual's clinical records

## Use multi-generational family history information to draw a pedigree
