

SFHRAD11

Receive and store radioactive and non-radioactive materials and products for use in manufacture and supply

Overview

This standard relates to storage of radionuclides, raw materials, radioactive and non-radioactive medicinal products under appropriate conditions and in specified locations.

Users of this standard will need to ensure that practice reflects up to date information and policies.

SFHRAD11

Receive and store radioactive and non-radioactive materials and products for use in manufacture and supply

Performance criteria

- You must be able to:*
- P1 check received materials against specified order and record and report
 - P2 isolate incorrect, damaged or unsuitable materials
 - P3 store materials in suitable locations and under suitable conditions
 - P4 ensure all materials and products are correctly labelled according to local procedures
 - P5 amend stock levels if required
 - P6 take relevant and timely corrective action to deal with radioactive contamination and/or damage to received items
 - P7 correctly apply relevant standard operating procedures
 - P8 knowledgeably receive radioactive materials in accordance with local and national guidelines

SFHRAD11

Receive and store radioactive and non-radioactive materials and products for use in manufacture and supply

Knowledge and understanding

You need to know and understand:

- K1 physical characteristics of radionuclides and related shielding requirements
- K2 radiation protection guidelines and their application, including Local Rules
- K3 storage requirements for materials
- K4 consequences of storage outside specified storage conditions
- K5 factors which influence the need to segregate stored materials
- K6 security and access requirements for storage
- K7 lines of reporting and authority for dealing with discrepancies, damage or incidents relating to storage
- K8 requirements for storage, handling and disposal of radioactive and non-radioactive medicinal products
- K9 range of relevant standard operating procedures
- K10 registration certificate requirements to meet current legislation and limits for the stockholding site

SFHRAD11

Receive and store radioactive and non-radioactive materials and products for use in manufacture and supply
