

OverviewThis standard covers the physical care and maintenance procedures required
to keep locks in custodial environments working effectively.

It includes the fitting, testing and maintenance of locks, keys and door fixtures.

This standard does not cover ordering parts, writing schedules or changing drawings. For these functions please see SFJ FD4 Manage lock maintenance in custodial environments

 You must be able to: P1 obtain locking schedule for lock maintenance work from your manager before starting the work in accordance with your organisation's procedures P2 use correct resources and equipment to carry out lock maintenance work in accordance with manufacturer's instructions P3 diagnose lock faults in accordance with your organisation's procedures, and: P3.1 report these to your manager P4 read layout drawings to confirm placement of locks as required by the locking schedule P5 check area is safe to begin maintenance work in accordance with your organisation's procedures P6 test bolts and locking plates as stated in the locking schedule P7 service locks in accordance with your organisation's procedures P8 install locks as stated in the locking schedule P10 complete visual inspections in accordance with your organisation's procedures, to check for: P10.1 security issues P10.2 damage P10.3 excessive wear P11 follow lock-condemn procedures P12 complete operational checks as stated in the locking schedule 	Performance

			procedures

Knowledge and understanding

You need to know and	K1	organisational procedures relating to lock maintenance
understand:	K2	organisational guidelines regarding locks
	K3	how to identify parts of a key
	K4	different door and hinge combinations used in custodial environments
	K5	different locks and their different uses
	K6	the range of lock classes
	K7	ways to utilise different levers in locks
	K8	the range of potential faults and their causes
	K9	different lock combinations
	K10	the range of different keys
	K11	the terminology of locks
	K12	the principles of key and lever pack reading
	K13	the inspection procedures used with locks in custodial environments
	K14	the operating specifications of different locks
	K15	methods used to expand lifespan of locks
	K16	custodial security procedures
	K17	who to obtain locking schedules from
	K18	how to read layout drawings
	K19	different tests for bolts and locking plates
	K20	methods for installing different locks
	K21	the types of anti-manipulation devices
	K22	how to replace lock handles
	K23	how to complete visual inspections
	K24	organisational lock-condemn procedures
	K25	what operational checks are required
	K26	what paperwork needs to be completed

Additional Information

Glossary Organisational procedures can include prison service instructions, prison policies, legislative policies and any other policies and procedures used across custodial care in the UK.
